How to Use Blocs Crumbs

Blocs Crumbs contain additional code that is necessary for the effect to function and display correctly.

These Crumbs are provided as a **Site Template**. After installation by **double-clicking**, you'll find them under **Templates** in Blocs.

Important: Do not modify the included code, as altering it may cause the effect to stop working properly.

Copying to Another Project:

If you want to transfer Blocs Crumbs to another project, make sure to copy the code from the **Code Section** into the new project as well. Without this, the effect won't work correctly.

Enjoy using Blocs Crumbs!
